

ASSIGNMENT NO.6: Data Manipulation and Table Management

Student Name	Amit Panorekar	Roll Number	20968
Batch	SY. BSc Data Science	Topic	WB(Assignment-6)

Q1) Create a MySQL database named CollegeDB and create two tables: Course and Student.

Course Table

Column Name	Data Type	Constraint
CourseID	INT	PRIMARY KEY
CourseName	VARCHAR(50)	NOT NULL
Fees	DECIMAL(10,2)	NOT NULL

Student Table

Column Name	Data Type	Constraint
StudentID	INT	PRIMARY KEY
StudentName	VARCHAR(50)	NOT NULL
Age	INT	
City	VARCHAR(30)	
CourseID	INT	FOREIGN KEY

QUERY:

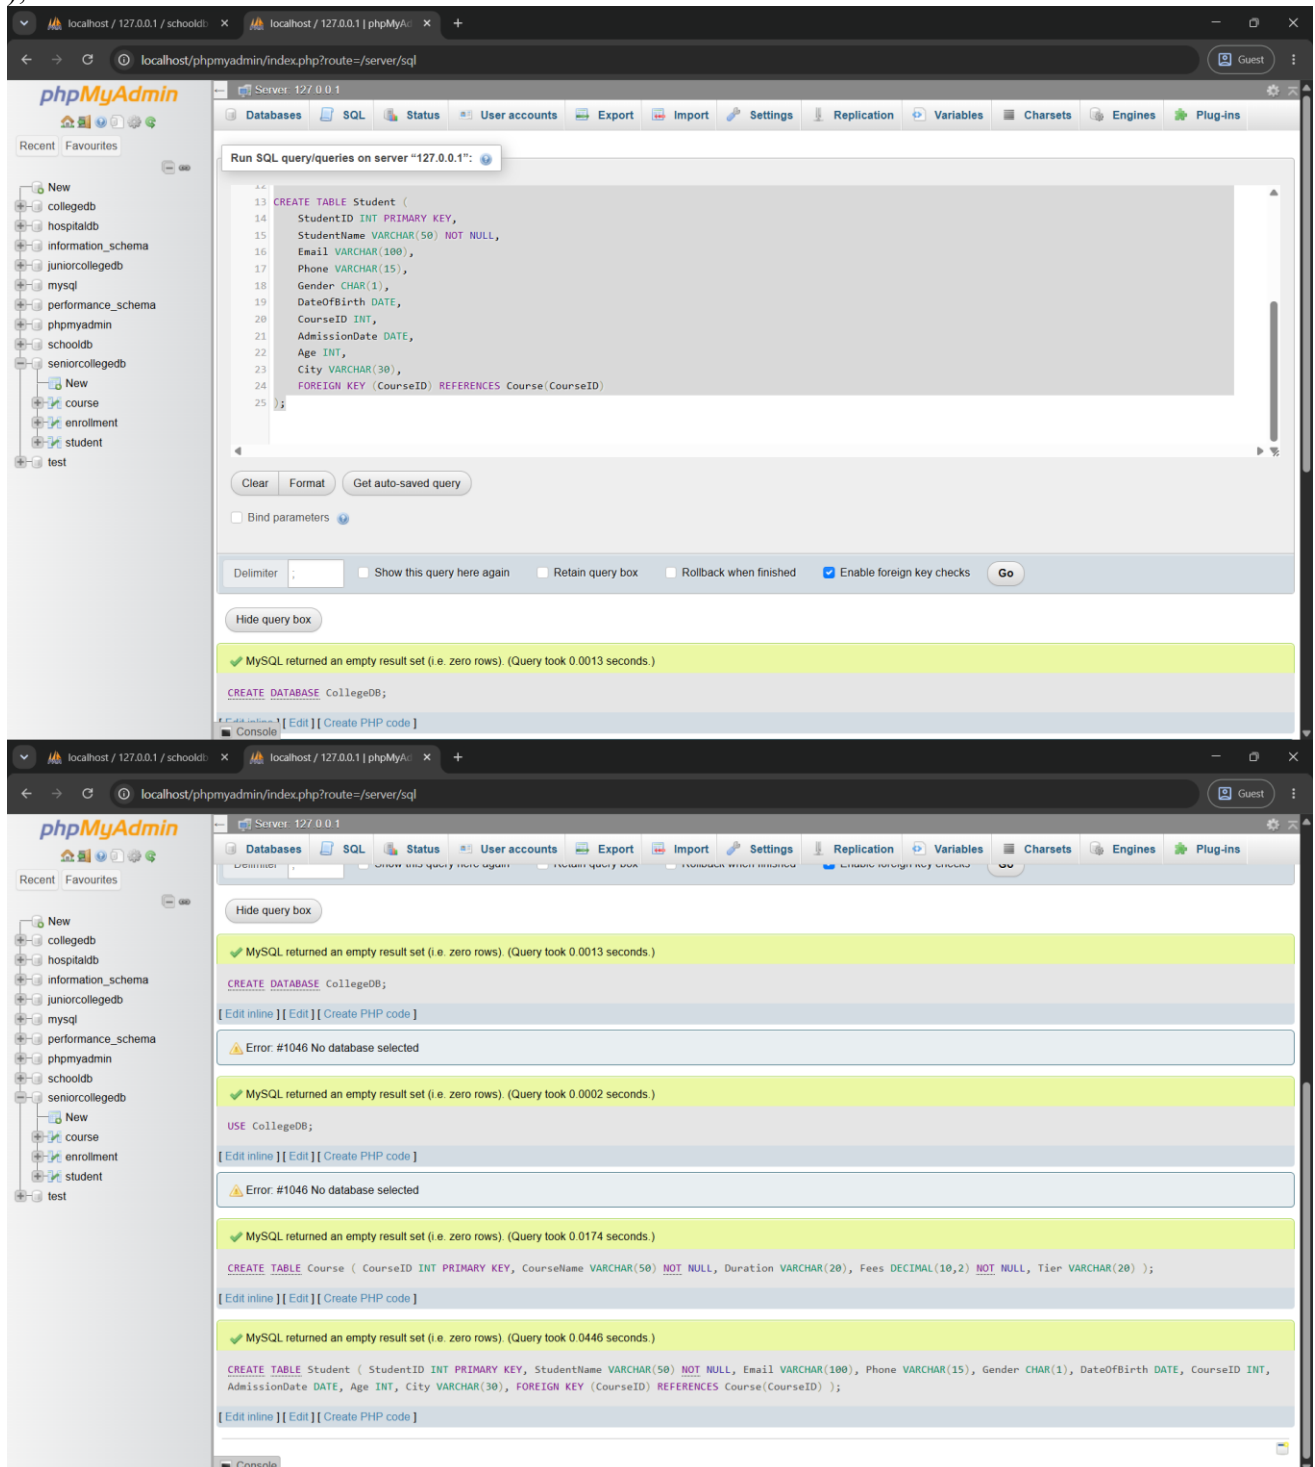

```
CREATE DATABASE CollegeDB;
```

```
USE CollegeDB;
```

```
CREATE TABLE Course (  
    CourseID INT PRIMARY KEY,  
    CourseName VARCHAR(50) NOT NULL,  
    Duration VARCHAR(20),  
    Fees DECIMAL(10,2) NOT NULL,  
    Tier VARCHAR(20)  
);
```

```
CREATE TABLE Student (  
    StudentID INT PRIMARY KEY,  
    StudentName VARCHAR(50) NOT NULL,  
    Email VARCHAR(100),  
    Phone VARCHAR(15),  
    Gender CHAR(1),  
    DateOfBirth DATE,  
    CourseID INT,
```

AdmissionDate DATE,
 Age INT,
 City VARCHAR(30),
 FOREIGN KEY (CourseID) REFERENCES Course(CourseID)
);

Q2) Insert at least 4 records into the Course table and 6 records into the Student table.

Make sure every student has a valid CourseID from the Course table.

QUERY:

INSERT VLAUES:

INSERT INTO course (CourseID, CourseName, Duration, Fees, Tier) VALUES

(101, 'B.Sc IT', '3 Years', 35000.00, NULL),
(102, 'BCA', '3 Years', 40000.00, NULL),
(103, 'BBA', '3 Years', 50000.00, NULL),
(104, 'Bsc DATA SCIENCE', '3 Years', 60000.00, NULL),
(105, 'MCA', '3 Years', 45000.00, NULL),
(106, 'B.Com', '3 Years', 60000.00, NULL),
(107, 'CSE', '4 Years', 80000.00, NULL),
(108, 'MSE', '2 Years', 50000.00, NULL);

INSERT INTO student (StudentID, StudentName, Email, Phone, Gender, DateOfBirth, CourseID, AdmissionDate, Age, City) VALUES

(1, 'Amit Sharma', 'amit@gmail.com', '9876543210', 'M', '2005-04-12', 101, '2026-07-07', 20, 'Mumbai'),

Console

Q3) Write a MySQL query to insert one new student record into the Student table.

The record could include:

Field
StudentID
StudentName

Age
City
CourseID

QUERY:

--Q3) Insert one new student record

INSERT INTO Student

(StudentID, StudentName, Age, City, CourseID)

VALUES

(10, 'Rohit Desai', 21, 'Mumbai', 103);

-- Verify: SELECT * FROM Student

WHERE StudentID =10;

OUTPUT:

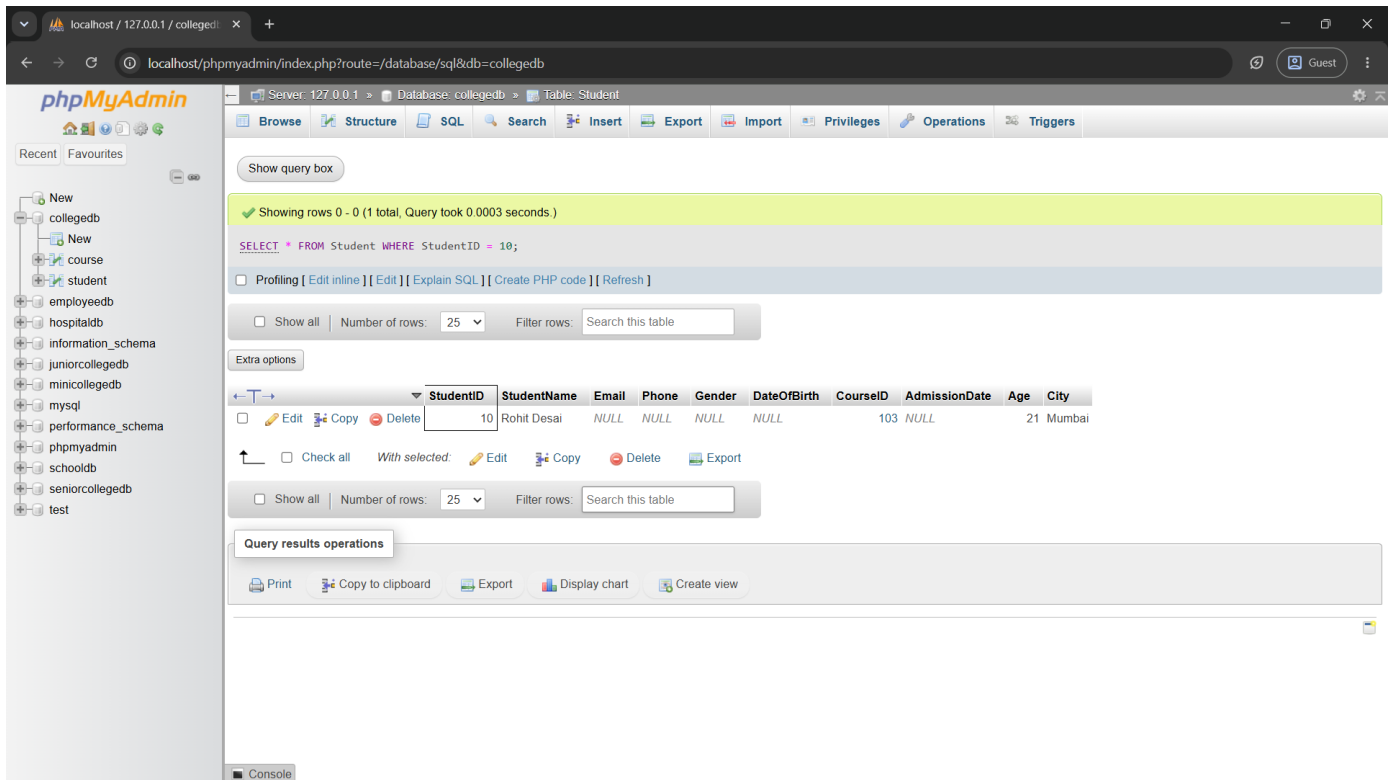

The screenshot shows the phpMyAdmin web interface in a browser. The address bar indicates the URL is localhost/phpmyadmin/index.php?route=/database/sql&db=college. The interface shows the 'college' database selected, and the 'Student' table is highlighted in the left sidebar. The main area displays the SQL query entered in the 'Run SQL query/queries on database college:' box. The query is as follows:

```

1  -- Q3) Insert one new student record
2
3  INSERT INTO Student
4  (StudentID, StudentName, Age, City, CourseID)
5  VALUES
6  (10, 'Rohit Desai', 21, 'Mumbai', 103);
7
8  -- Verify:
9  SELECT * FROM Student
10 WHERE StudentID =10;

```

Below the query box, there are buttons for 'Clear', 'Format', and 'Get auto-saved query'. There is also a checkbox for 'Bind parameters' which is unchecked. At the bottom of the query box, there are options for 'Delimiter' (set to semicolon), 'Show this query here again' (unchecked), 'Retain query box' (unchecked), 'Rollback when finished' (unchecked), 'Enable foreign key checks' (checked), and a 'Go' button. Below the query box, there is a 'Hide query box' button. At the bottom of the interface, a green status bar indicates the result: '1 row inserted. (Query took 0.0277 seconds.)'

Q4) Write a MySQL query to update the city of a student using StudentID.

Example requirement:

Change Required

Update the city of StudentID 2 to Mumbai

QUERY:

-- Q4) Update the city of StudentID 2 to Mumbai

UPDATE Student

SET City = 'Mumbai'

WHERE StudentID = 2;

-- Verify:

SELECT * FROM Student

WHERE StudentID = 2;

OUTPUT:

localhost / 127.0.0.1 / collegedb

localhost/phpmyadmin/index.php?route=/database/sql&db=collegedb

Console

Q5) Write a MySQL query to update the fees of a course using CourseID.

Example requirement:

Change Required
Update the fees of CourseID 101 to 47000

QUERY:

Q5) Update fees of CourseID 101 to 47000

UPDATE Course

SET Fees = 47000.00

WHERE CourseID = 101;

Verify:

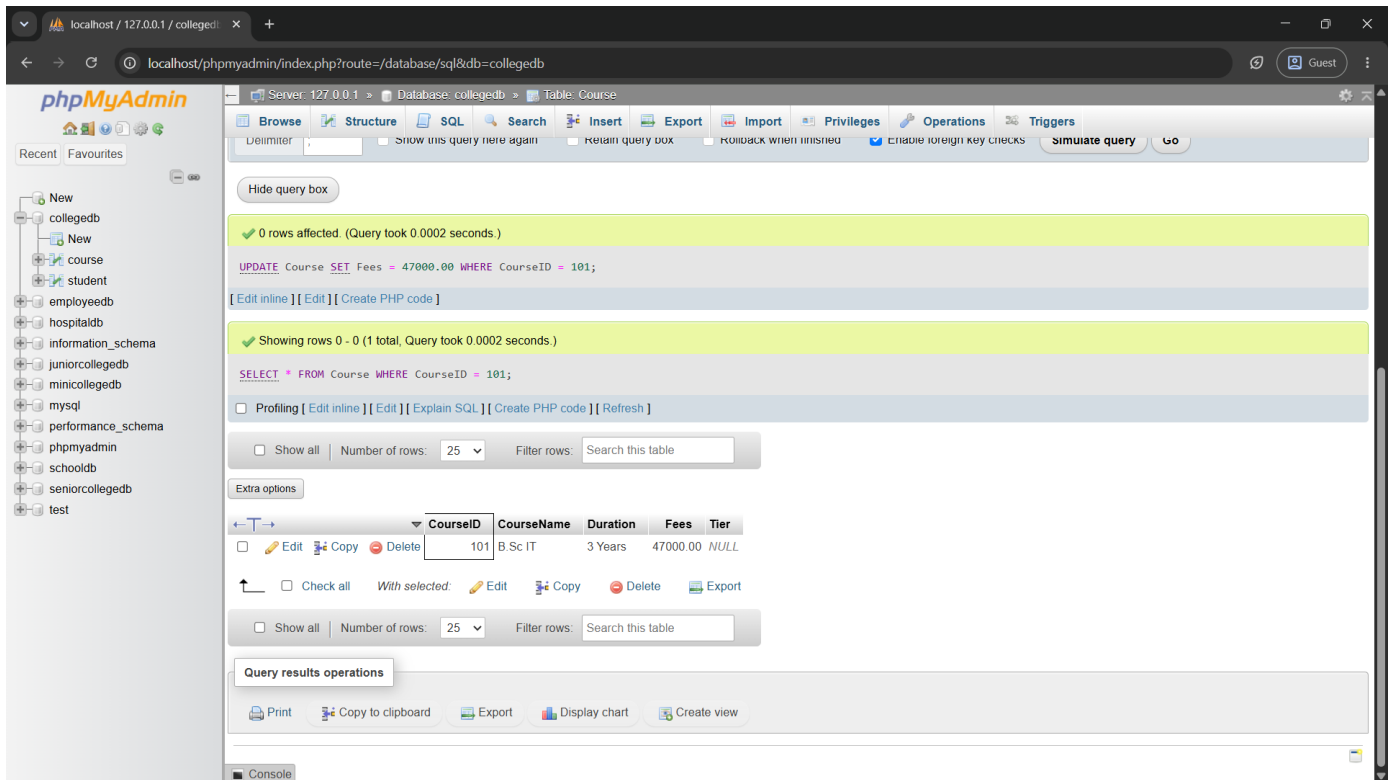

SELECT * FROM Course WHERE CourseID = 101;

OUTPUT:

The screenshot displays the phpMyAdmin web interface in a browser window. The address bar shows the URL: `localhost/phpmyadmin/index.php?route=/database/sql&db=collegedb`. The interface includes a sidebar on the left with a database tree view showing various databases like `collegedb`, `employeeedb`, and `test`. The main panel is titled "Run SQL query/queries on database collegedb:" and contains a text area with the following SQL query:

```
1 UPDATE Course
2 SET Fees = 47000.00
3 WHERE CourseID = 101;
4 SELECT * FROM Course WHERE CourseID = 101;
5
```

Below the query text area are buttons for "Clear", "Format", and "Get auto-saved query". There is also a checkbox for "Bind parameters". At the bottom of the main panel, there are several options: "Delimiter" set to ";", checkboxes for "Show this query here again", "Retain query box", "Rollback when finished", and "Enable foreign key checks" (which is checked). There are "Simulate query" and "Go" buttons. Below these options is a "Hide query box" button. A green status bar at the bottom of the main panel indicates: "0 rows affected (Query took 0.0002 seconds)". Below this, the executed query is shown: `UPDATE Course SET Fees = 47000.00 WHERE CourseID = 101;`. At the very bottom, there is a "Console" tab and links for "[Edit]" and "[Create PHP code]".

Q6) Write a MySQL query to delete one student record using StudentID.

Also write one line explaining why the WHERE clause is important while using DELETE.

DELETE FROM Student

WHERE StudentID = 6;

Verify:

SELECT * FROM Student;

The WHERE clause ensures that only the specified student record is deleted.

Without WHERE, all records from the Student table would be deleted.
